# Project Design Phase-II Technology Stack (Architecture & Stack)

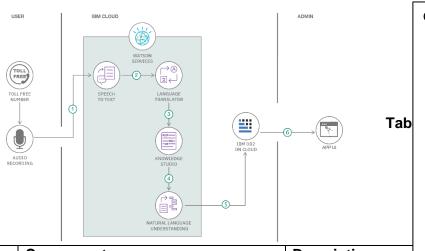

Date	26-05-2023
Team ID	NM2023TMID22560
Project Name	Al enabled car parking using OpenCV

#### **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

Example: Order processing during pandemics for offline mode

Reference: <a href="https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/">https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/</a>

#### Guidelines:

Include all the processes (As an application logic / Technology Block)

Provide infrastructural demarcation (Local / Cloud) Indicate external interfaces (third party API's etc.) Indicate Data Storage components / services Indicate interface to machine learning models (if applicable)

S.No	Component	Description	
1.	User Interface	How user interacts with application e.g.	HTML, CSS, JavaScript / Angular Js /
2.	Application Logic-1	Web UI, Mobile App, Chatbot etc.  Logic for a process in the application	React Js etc. Java / Python

3.	Application Logic-2	Logic for a process in the application	IBM Watson STT service	
4.	Application Logic-3	Logic for a process in the application	IBM Watson Assistant	
5.	Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.	
6.	Cloud Database	Database Service on Cloud	IBM DB2, IBM Cloudant etc.	
7.	File Storage	File storage requirements	IBM Block Storage or Other Storage Service or Local Filesystem	
8.	External API-1	Purpose of External API used in the application	IBM Weather API, etc.	
9.	External API-2	Purpose of External API used in the application	Aadhar API, etc.	
10.	Machine Learning Model	Purpose of Machine Learning Model	Object Recognition Model, etc.	
11.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration:	Local, Cloud Foundry, Kubernetes, etc.	

## **Table-2: Application Characteristics:**

S.No	Characteristics	Description	Technology	
1.	Open-Source Frameworks	List the open-source frameworks used	Technology of Opensource framework	
2.	Security Implementations	List all the security / access controls implemented, e.g. SHA-256, Encryptio		
use of firewa		use of firewalls etc.	Controls, OWASP etc.	
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier,	Technology used	
		Micro-services)		
4.	Availability	Justify the availability of application (e.g. use of	Technology used	
	load balancers, distributed servers etc.)			
5.	Performance	Design consideration for the performance of the Technology used		
	application (number of requests per sec, use of			
		Cache, use of CDN's) etc.
